DOOR & CABINET CARE

Your kitchen or bedroom furniture is designed to look beautiful for years. A little regular care will keep it that way. Here are some simple guidelines for all door types.

PAINTED & VINYL WRAPPED DOORS

— Clean with a soft, damp (not wet) cloth using a mild solution of 5% liquid soap and 95% warm water.
— Dry immediately with a soft, clean cloth to avoid moisture damage.
— Never use abrasive cleaners, scouring pads, bleach or solvent-based products.
— Avoid excessive moisture around edges and joints — wipe up spills promptly.
— Do not use steam cleaners on or near your doors.

TIMBER & STAINED DOORS

— Dust regularly with a soft, dry cloth.
— Clean with a barely damp cloth and mild soapy water. Always dry immediately.
— Natural timber may lighten or darken over time — this is normal and part of the character of real wood.
— Do not use polish sprays containing silicone, as they can leave a residue.
— Never use abrasive cleaners, scouring pads, bleach or solvent-based products.
— Avoid excessive moisture around edges and joints — wipe up spills promptly.
— Do not use steam cleaners on or near your doors.

HINGES & HARDWARE (BLUM)

— Blum soft-close hinges and drawer runners are designed to be maintenance-free. If a door or drawer becomes misaligned, adjustments can be made easily.
— Hinges have three-way adjustment (height, depth and side-to-side). Use a Pozidriv screwdriver to fine-tune.
— Clean hardware with a soft damp cloth only — never use abrasive or chemical cleaners on metal fittings.
— If a soft-close hinge feels too fast or slow, locate the small adjustment lever on the hinge arm and slide it forward or backward.

WORKTOP CARE

Your worktops are one of the hardest-working surfaces in your home. With the right care, they will maintain their beauty for decades. Below you'll find care guidance for each worktop type we supply.

SILESTONE & QUARTZ

Silestone is a quartz surface with excellent stain resistance. For daily cleaning:

- Apply neutral soap to the area and gently rub in a circular motion with a damp microfibre cloth.
- Leave for a couple of minutes, then wipe off any soap residue and dry with kitchen roll.
- For limescale or stubborn stains, use an anti-limescale product with a soft cloth in a circular motion.
- Avoid using bleach, high-pH cleaners, or scouring pads.
- Never place hot pots, pans or trays directly on the surface — always use pan stands, trivets or heat-resistant mats to protect the worktop.
- Wipe up spills promptly, especially acidic substances such as lemon juice, vinegar, wine or tomato-based sauces, as these can dull or damage the polished finish over time.
- Silestone carries a 25-year warranty from Cosentino.

DEKTON & PORCELAIN

Dekton is an ultra-compact surface with near-zero porosity, highly resistant to stains, scratches and heat.

- For daily cleaning, use neutral soap and water or Cosentino Q-Action cleaner with a sponge.
- If stains persist, apply a limescale remover with a soft scouring pad, rub in circular motions for 1-2 minutes, rinse with water and dry.
- Do not use metal scouring pads or abrasive cleaning agents.
- Dekton carries a 25-year warranty from Cosentino.

SENSA NATURAL GRANITE

- Sensa granite is treated with a stain-protection treatment. Clean with mild soap and water.
- Avoid acidic cleaners (lemon, vinegar) as they can dull the surface over time.
- Sensa carries a 15-year warranty from Cosentino.

Dekton Maintenance ›

EGGER LAMINATE

- Clean with a soft, damp cloth and mild soapy water or glass cleaner. Microfibre cloths work best.
- Always wipe dry afterwards — avoid leaving excess water, especially around edges and joints.
- Never use abrasive powders, steel wool, scouring pads or harsh chemical cleaners.
- Do not use steam cleaners on laminate surfaces, as excessive heat and moisture can cause damage.
- Always use chopping boards when cutting — never cut directly on the surface.
- Place heat-resistant mats under hot pots, pans and trays to protect the laminate finish.
- Wipe up spills promptly to prevent moisture seeping into joints or edges.

APPLIANCE CARE

Each of your appliances comes with a detailed manual. Below are quick-reference care tips for the brands we work with. Always refer to your product manual for full guidance.

BORA COOKTOPS & EXTRACTORS

— Allow the cooktop to cool before cleaning. Use a glass ceramic cleaner or glass cleaner with a microfibre cloth.
— For burnt-on food, use a glass ceramic scraper with light pressure only — never a knife or scouring pad.
— Clean the grease filter and extractor weekly and after greasy cooking. Parts are dishwasher-safe at up to 65°C.
— Replace the activated charcoal filter (recirculation models) when extraction drops or odours build up.

SMEG OVENS & APPLIANCES

— Wipe the oven cavity with a soft cloth after each use. Clean the door and front with warm water and mild detergent.
— Use the built-in cleaning programme (Pyrolytic or Vapour Clean) as recommended in your manual.
— Before running a Pyrolytic clean, remove any food debris from the inside of the door glass. Residue left on the glass can burn on at high temperatures and can cause the glass to shatter.
— Never use abrasive cleaners or spray oven cleaner directly into the cavity — apply to a cloth first.

AEG OVENS & APPLIANCES

— Clean the oven cavity after each use. Use the self-cleaning programme (Pyrolytic or AquaClean) where available.
— Before running a Pyrolytic clean, remove any food debris from the inside of the door glass. Residue left on the glass can burn on at high temperatures and can cause the glass to shatter.
— Run a maintenance wash on dishwashers/washing machines twice a month with an empty load at high temperature.
— Descale steam ovens regularly using the built-in descaling programme and AEG Steam Care products.

QUOOKER BOILING WATER TAPS

— Clean the tap with warm water and a soft cloth only. Do not use any cleaning products — they can damage the finish.
— Dry the tap immediately after use to prevent limescale build-up.
— If water flow weakens, unscrew the aerator and soak in cleaning vinegar for an hour, then rinse and refit.
— For patinated brass finishes, apply a thin layer of beeswax every 3 to 6 months for extra protection.
— Quooker recommend a professional service every 2 years in hard water areas, or every 4–5 years in soft water areas. You can book a service at quooker.co.uk.

LIEBHERR REFRIGERATION

— Clean the interior regularly using warm water with a splash of washing-up liquid and a microfibre cloth.
— Remove shelves and drawers to wash separately. Be careful not to wipe grease from drawer runners.

REGISTER YOUR APPLIANCES

We strongly recommend registering each of your appliances as soon as possible. Registration activates your manufacturer's warranty and gives you access to support and spare parts.

BORA

Register your appliance to activate your manufacturer's warranty and access support and spare parts.

Register at mybora.com ›

SMEG

Register your Smeg appliance to activate your warranty and access product support.

Register at smeguk.com ›

QUOOKER

Create a My Quooker account to register your system, access service history and order parts.

Register at quooker.co.uk ›

AEG

Register with MyAEG for warranty cover, personalised support and smart appliance connectivity.

Register at aeg.co.uk ›

LIEBHERR

Register your Liebherr appliance to activate your guarantee and access support.

Register at liebherr.com ›

Important

Some extended warranties must be claimed within 90 days of purchase. Please register as soon as possible to ensure you don't miss the deadline. Keep your proof of purchase safe — you'll need it for any warranty claims.

A FEW THINGS WE LOVE

Beyond the kitchen, here are a couple of brands we genuinely use, love and would buy again tomorrow. We've included our personal referral links — you get a discount, and we get a small thank-you from the brand. Win-win.

EIGHT SLEEP

The one thing we own that, if it broke, we would go out and buy another one tomorrow. The Pod is a smart mattress cover that actively cools and warms the bed through the night, so you fall asleep faster, stay asleep longer and wake up feeling properly rested. It's changed how we sleep — we genuinely can't recommend it enough.

Get your discount at refer.eight.sl/kkt93tpx ›

EXHALE COFFEE

The coffee we serve in our showroom — and the same coffee we drink at home. Organic, ethically sourced and lab-tested to make sure it's as healthy as it is delicious. Roasted fresh weekly in Brixton, London, and packed with more antioxidants and polyphenols than the average cup. If you love good coffee, you'll love this.
